

Monoclonal Anti-Ferret Interferon Gamma, Clone 4A4B7 (produced *in vitro*)

Catalog No. NR-4492

For research use only. Not for human use.

Contributor:

David J. Kelvin, Ph.D., Head, Division of Experimental Therapeutics Toronto General Research Institute, Toronto, Ontario, Canada

Product Description:

Antibody Class: IgG2a

Monoclonal antibody prepared against full-length ferret recombinant interferon gamma (without glutathione S-transferase tag) was purified from hybridoma supernatant by protein G affinity chromatography. The B cell hybridoma was generated by the fusion of SP2/0 myeloma cells with immunized BALB/c mouse splenocytes.

NR-4492 reacts with BEI Resources NR-10349 (Ferret Recombinant Interferon Gamma, With N-Terminal Glutathione S-Transferase Tag). NR-4492 and a second monoclonal antibody, BEI Resources NR-4493, recognize distinct epitopes on NR-10349 as demonstrated by capture/detection ELISA.

Material Provided:

Each vial of NR-4492 contains approximately 0.1 mg of purified monoclonal antibody in PBS. The concentration, expressed as mg per mL, is shown on the Certificate of Analysis.

Packaging/Storage:

NR-4492 was packaged aseptically in cryovials and is provided frozen on dry ice. For long-term storage, NR-4492 should be aliquoted and stored at -20°C to -80°C. Freeze-thaw cycles should be avoided. Working aliquots may be stored at 4°C.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. [Biosafety in Microbiological and Biomedical Laboratories](#), 5th ed. Washington, DC: U.S. Government Printing Office, 2007; see www.cdc.gov/od/ohs/biosfty/bmb15/bmb15toc.htm.

Citation:

Acknowledgment for publications should read "The following reagent was obtained through the NIH Biodefense and

Emerging Infections Research Resources Repository, NIAID, NIH: Monoclonal Anti-Ferret Interferon Gamma, Clone 4A4B7 (produced *in vitro*), NR-4492."

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government make any warranties or representations as to its accuracy.
