Mechanical Action:

Etravirine, also known as Intelence or TMC125, is an HIV-1 non-nucleoside reverse transcriptase inhibitor (NNRTI). Unlike other NNRTI's, Etravirine is much less susceptible to

viral resistance and is active against virus resistant to efavirenz and nevirapine.

WARNING: Harmful if swallowed. May be harmful by inhalation. This substance is

not yet fully tested.

Special Characteristics: All recipients must complete the TMC125 Addendum prior to reciept of this reagent.
