

# Product Information Sheet for HRP-20131

## Simian Immunodeficiency Virus, SIVhoest-524 (34C)

### Catalog No. HRP-20131

This reagent is the tangible property of the U.S. Government.

### Lot No. 70053284

**For research use only. Not for use in humans.**

### Contributor and Manufacturer:

Vanessa M. Hirsch, D.V.M., D.Sc., Laboratory of Molecular Biology, National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), Bethesda, Maryland, USA

### Product Description:

**VIRUS CLASSIFICATION:** *Retroviridae, Lentivirus*

**SPECIES:** Simian immunodeficiency virus

**STRAIN/ISOLATE:** SIVhoest-524 (34C)

**ORIGINAL SOURCE:** Simian immunodeficiency virus (SIV), SIVhoest-524 (34C) was isolated in 2000 from peripheral blood mononuclear cells (PBMC) of a wild-caught L'Hoest monkey in the Democratic Republic of Congo by cocultivation with the human T-cell line Molt4-Clone8 (M4C8).<sup>1,2</sup>

**COMMENTS:** A nearly full-length genome sequence of SIVhoest-524 (34C) is available (GenBank: [AF188116.1](#)).<sup>2</sup> Although this strain has not been evaluated *in vivo*, a similar isolate from a zoo animal was demonstrated to induce AIDS in pig-tailed macaques.<sup>3</sup>

### Material Provided:

Each vial contains approximately 1.0 mL of supernatant from infected CEMss cells. The virus supernatants were prepared by centrifugation followed by filtration through a 0.45 µm filter. HRP-20131 has not been tested for mycoplasma contamination.<sup>1</sup>

**Note:** If homogeneity is required for your intended use, please purify prior to initiating work.

### Packaging/Storage:

HRP-20131 was packaged aseptically in plastic cryovials. The product is provided frozen and should be stored at -100°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

### Growth Conditions:

**HOST:** CEMss cells

**GROWTH MEDIUM:** RPMI 1640 medium supplemented with 10% heat-inactivated fetal bovine serum

**INFECTION:** Cells should be 70% to 90% confluent

**INCUBATION:** 10 to 14 days at 37°C and 5% CO<sub>2</sub>

### Citation:

Acknowledgment for publications should read "The following reagent was obtained through the NIH HIV Reagent Program, NIAID, NIH: Simian Immunodeficiency Virus, SIVhoest-524 (34C), HRP-20131, contributed by Dr. Vanessa M. Hirsch."

### Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. [Biosafety in Microbiological and Biomedical Laboratories](#). 6th ed. Washington, DC: U.S. Government Printing Office, 2020; see [www.cdc.gov/biosafety/publications/bmbl5/index.htm](http://www.cdc.gov/biosafety/publications/bmbl5/index.htm).

### Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the NIH HIV Reagent Program Material Transfer Agreement (MTA). The MTA is available on our Web site at [www.hivreagentprogram.org](http://www.hivreagentprogram.org).

While the NIH HIV Reagent Program uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use, and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure the authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to the NIH HIV Reagent Program are not liable for damages arising from the misidentification or misrepresentation of products.

### Use Restrictions:

**This material is distributed for internal research, non-commercial purposes only.** This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
