Product Information Sheet for NR-58916

Monoclonal Anti-SARS-Related Coronavirus 2 Spike Glycoprotein Receptor Binding Domain (RBD), Native Antigen, Clone 62.1.1 (produced *in vitro*)

Catalog No. NR-58916

For research use only. Not for use in humans.

Contributor and Manufacturer:
BEI Resources

Product Description:
Antibody Class: IgG1κ
Mouse monoclonal antibody against the severe acute respiratory syndrome-related coronavirus 2 (SARS-CoV-2) Wuhan-Hu-1 spike glycoprotein receptor binding domain (RBD) was purified from hybridoma clone 62.1.1 culture supernatant by protein G affinity chromatography (Figure 1). The B cell hybridoma was generated by the fusion of Sp2/0-Ag14 mouse myeloma cells with splenocytes from BALB/c mice immunized with recombinant purified native RBD antigen and subsequent clonal selection. The recombinant antigen was produced *in vitro* by transfecting 293F cells with the RBD expression vector (BEI Resources NR-52309).

Material Provided:
Each vial of NR-58916 contains approximately 100 µg of purified monoclonal antibody in PBS. The concentration, expressed as mg/mL, is shown on the Certificate of Analysis.

Packaging/Storage:
NR-58916 was packaged aseptically in screw-capped plastic vials and is provided frozen on dry ice. The product should be stored at -20°C or colder immediately upon arrival. Freeze-thaw cycles should be avoided.

Functional Activity:
NR-58916 is specific to the SARS-CoV-2 RBD protein and shows cross-reactivity with SARS-CoV-2 spike-D614G but not the SARS-CoV-1 spike protein (BEI Resources NR-623) or MERS-CoV spike protein (BEI Resources NR-53591). NR-58916 has a relatively high affinity to the SARS-CoV-2 RBD and SARS-CoV-2-Spike-D614G proteins. Neutralization capabilities of this antibody were measured through the c-Pass and pseudo-typed SARS-CoV-2 S lentiviral particle-based assays, which resulted in IC50 values of 33.93 ng/mL and 491.9 ng/mL, respectively.

Citation:
Acknowledgment for publications should read "The following reagent was obtained through BEI Resources, NIAID, NIH: Monoclonal Anti-SARS-Related Coronavirus 2 Spike Glycoprotein Receptor Binding Domain (RBD), Native Antigen, Clone 62.1.1 (produced *in vitro*), NR-58916."

Biosafety Level: 1
Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories (BMBL). 6th ed. Washington, DC: U.S. Government Printing Office, 2020.

Disclaimers:
You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.
